

School Identification Timeline

Prior to Senate Bill 158 (2020), schools were identified for comprehensive support and improvement (CSI) annually. Beginning with the 2022-2023 school year, schools were identified for CSI and additional targeted support and improvement (ATSI) every three years. House Bill 298 (2025) returns CSI identification to an annual process. ATSI identification remains every three years and schools will be identified for targeted support and improvement (TSI) annually. The below chart outlines the progression of identified schools from the year data was collected and indicates the years counted toward the number of years in which a school must exit before becoming eligible for additional implications:

	Year 0 (Data)	Year 1	Year 2	Year 3	Year 4

* The 2021-2022 Addendum for the Consolidated State Plan allows the Kentucky Department of Education (KDE) not to count the 2019-2020 and 2020-2021 school years toward the number of years in which a school must meet the criteria to exit CSI and ATSI status.

The below timeline indicates the year of identification for each cohort and outlines possible scenarios for schools that do not exit.
